Subject :- Power Supply to Hindupur

Reference :- Correspondence ending with Memo No D 8373-34/R.O. II dated the 26th September 1934 from the Asst. Secy. to the Hon'ble the Resident in Mysore

Resubmitted with reference to orders dated the 24th August 1934. With the Resident's Memo referred to above, Mr. Sangam Babu's letter has been received thro' the Govt. of Madras also.

The C.E.E. who was requested to intimate how much power can be conveniently spared for places outside the state in view of our own requirements reports that owing to the fact that Bhadravathi Electrification Scheme is likely to be sanctioned, a large amount of power would be required to meet the demands there as well as in places en route. Further, the C.E.E. adds that there is increase in the demand for power in every day use by the mines

at the K. G. F. and that the Station will be loaded practically to its capacity.

Under the circumstances the Govt. of Madras will, ~~if approached~~ be informed through the Residency that the Mysore Govt. is not in a position to spare any power for places outside the State and that the same may be communicated to the Hindupur Municipality with reference to the letter of M. R. Ry. C. Sangam Babu Garu B.A. Municipal Commissioner, Hindupur.

A Draft letter to the Residency is herewith put up for favour of approval.

Subject :- Electrification of Gudibanda Town —

Reference :- Correspondence ending with letter No 7067 dated the 17th January 1934

Resubmitted with reference to orders dated the 2nd January 1934.

The E.E. reports that Gudibanda is 23 miles from Chickballapur and that an estimate amounting to Rs 64,000/- has been prepared for its Electrification. The return expected is stated to be only 2·7 %. The E.E. adds that as the income on the outlay is very low, it is not possible to carry out the work, unless the requirements of Gudibanda and other places (as in margin) on the line are enhanced adequately to guarantee an annual revenue of Rs 6800/- a year.

Subject:- Notes of Inspection by the First Member of Council during his Tour in the Kolar District in the month of February 1939.

Reference:- Chief Electrical Engineer's letter No. 23880 dated the 23/17th April 1939.

There are two questions raised in the ~~Tour~~ above --

Notes:-

1. Supply of electric power to Hindupur

The Chief Electrical Engineer states that the estimate for the supply of electric power to Hindupur is very nearly ready for submission to Government, ~~and that~~ it is expected ~~that it will be submitted~~ to be submitted by him sometime next week. This will be available.

2. Supply of electric power to Gudibanda

A project amounting to Rs.64,000/- was prepared by the electrical department so long ago as 1934 and as the return was less than 3%, it was ordered by Government in their order No.EDS 564 of the -- 21st September 1937 that the scheme was not worthwhile being undertaken unless a return of 10% - could be expected from it. The Chief Electrical Engineer now states that, if the project of -- supplying power to Hindupur from Dodballapur -- materialises, there will be reduction of about --- Rs.8,000/- in the capital cost of Gudibanda scheme.

ELECTRICAL SECRETARIAT. File No. of 193 .

Serial No.

Subject:- Electrification of Hindupur

Reference:- Chief Electrical Engineer's letter No.27632 dated 30th May 1939 .

The position as regards the supply of electric power to Hindupur, which is in Madras, is as follows:-

(a) The initial request came from the Hindupur Municipality.

(b) So far as the Madras Government is concerned all that they have done is forwarded ~~the~~ a letter from the Hindupur Municipality in 1934. This can hardly be taken as agreement of the Madras Government to the supply of electricity from the Mysore State to Hindupur in the Madras Presidency.

(c) In September 1934 the then Chief Electrical Engineer wrote that in view of the demands for power within the Mysore State it was not advisable to sell any power to outside the State.

(d) The subject has come up again following Notes of the First Member's tour in the Kolar District this year.

The first thing to do is to draw the attention of the Chief Electrical Engineer to the opinion expressed by his predecessor in 1934 and ask him whether if this scheme is ever taken up, it should not be deferred until after power is available from Jog. The second point is to ascertain whether the Madras Government are in

Subject:- Electrification of Hindupur.

Letters to Chief Electrical Engineer and Residency issued on 3rd June 1939. Chief Electrical Engineer's reply received on 20th June 1939 (Folio 59) and reply from Residency on 9th November 1939.

The Residency now intimate that the Government of Madras write that the proposal of the Government of Mysore to supply electricity to Hindupur cannot be taken up at present, but that they would be --- prepared to consider the question later if the Government of Mysore were willing to supply at 50 cycles at a place very near Hindupur on favourable conditions also made. In their order of the 3rd August 1939 the Government have directed that the rest of the State excluding the Kolar Gold Fields ~~is~~ be converted from 25 to 50 cycles any time between 1942 and 1950 after Mir Jog Station comes into operation. Since the Government of Madras are not keen about having electric supply to Hindupur ~~at~~ in the immediate future, it is a point for consideration whether the Chief Electrical Engineer may not be informed that it is not necessary to --- sanction the estimate amounting to Rs 1,04,400 submitted by him in May 1939. Besides on account of war the estimate may require revision. The decision of the Govt. of Madras will also be intimated to him.

Sir,

Re:- The Electrification of Gudibanda Town.

With reference to your memo No.EDS-1242 dated 12-1-34 forwarding extracts of the petition of Mr. G.K.Gopala Rao of Gudibanda, I have the honor to inform you that an estimate has been prepared for the electrification of the above town and the amount of the estimate comes up to Rs.64,000/-. From the requirements of the marginally noted places, as ascertained from the Amildar, the return on the capital outlay comes up to only 2.7% as the above place is 23 miles from Chikballapur. As the income on the outlay is very low, it is not possible to carry out the work unless the requirements of the places are enhanced adequately to guarantee an annual revenue of Rs.6,800/- per year.

As advised by the Madras Government in their Memorandum No. 486 F/34-5 dated 20-6-34, the council resolved that the Chairman and the Commissioner should wait

on you for a deputation to explain the matters personally and accordingly you were pleased to grant them an interview on the 25th July 1934. It has been reported to the Council that during the course of interview the question of supply of electricity by your Government was fully discussed and the following conclusions were arrived at:-

(1) That your Government have agreed to deliver power at the frontier Kudumulakunta and supply energy at the rate of one anna per unit.

(2) That your Government require an undertaking about the maximum consumption to be given, the amount of which has to be settled by correspondence.

(3) That your Government would undertake to deliver power at the Hindupur Power Station provided the whole work is given to you on a contract basis.

I request you to confirm the above conclusions and to intimate me whether your Government would stipulate any more conditions for the supply of energy to this municipality. The favour of an early reply is solicited as the Municipal Council is anxious to popularise electricity for all purposes in the town.

Secretary, L.S.G.

During my visit to Gudibanda, the Municipal Council presented an address to me in which they asked among others for the extension of electric light and power to the town - and also for a grant of Rs.5,000 from Government towards certain proposed improvements to the town. I have asked the Deputy Commissioner to consider the request in connection -- with the distribution of town improvement grants among the - several towns in the District. The question of electrification of Gudibanda may be examined with reference to the capacity of the Municipal Council to furnish the guarantee required -- under the rules.

Intd. S.P.R.

No.EDS 368. Dated, Bangalore 27/8 August 1937.

Copy of the above is forwarded with compliments to the Chief Electrical Engineer for favour of a report re. the -- electrification of Gudibanda.

(MYSORE, S. INDIA.)

From

S. G. FORBES, Esq., E. E., B. Sc., E. & M. E., Mem A. I. E. E.,
Chief Electrical Engineer
to the Government of Mysore,
Bangalore.

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Electrical Department, Bangalore.

Sir,

Electrification of Gudibanda in
Kolar District.

With reference to your Memo No.E.D.S.368 dated 27th August 1937, I have the honour to invite kind reference to my letter No.7067 dated 17th January 2 1934 1937 and to state that an estimate for the Electrification of Gudibanda Town amounting to Rs64,000/- was prepared and as the revenue prospects on the capital outlay worked out to less than 3%, the estimate was not sent up to Government for consideration and sanction.

I have the honour to be,
Sir,
Your most obedient servant,

OFFICIAL MEMORANDUM.

The accompanying extracts of notes of Inspection by the First Member of Council during his tour in the Kolar District in the month of February 1938 are forwarded with compliments to the Secretary to Government Electrical Department for favour of necessary action.

Immediate action with the powers of the Heads of Departments and the Deputy Commissioners concerned should be taken on all matters on which clear instructions are issued in the notes. If there should be any difficulty in carrying out the instructions, the Heads of Departments and the Deputy Commissioners will be requested to bring them to the notice of Government through the concerned Secretary to Government by special reports and obtain orders through the concerned Secretary to Government.

A fortnightly report of action taken should be obtained by the Administrative Branches concerned and submitted to the Member of Council until all the matters referred to in the notes are brought to disposal.

By Order.

C. S. Srinivasa Char

Sir,

Herewith submitted

FIRST MEMBER OF COUNCIL INSPECTION NOTE -- FEBRUARY 1939.

I have your letter No.EDS-2483 dated the 13th instant and in reply have the honour to inform you that the estimate for the supply of electric power to Hindupur is very nearly ready for submission to Government, it is expected that it will be submitted sometime next week.

2. With reference to the supply of electric power to Gudibanda, I have the honour to inform you that the Project was investigated in 1934 and a report submitted with this office No.7067 dated 17th January 1934. This Project was also referred to in this office No.2825 dated 30/31st August 1937.

Folio 11) & 27)

This Project showed a gross return of Rs5,332/- at a total estimated capital cost of Rs64,000/- or a net return, after allowing for depreciation and operation costs of Rs1,742/-, of about 2.7% on the capital outlay.

However, if Government delete the cost of the supply line amounting to Rs33,685/- from the Project estimate, then the gross return will be equivalent to 17½%.

The proposal to supply power to Hindupur includes a 37.5 kV line from Doddaballapur to Goribidnur and thence to the frontier. If this project materialises, then the supply line for Gudibanda will be from Goribidnur with a reduction of about Rs8000/- in the cost, which reduction will make the proposition still more attractive.

I have the honour to be,

Sir,

Your most obedient servant,

S. G. Forbes

Chief Electrical Engineer.

Electrification of Hindupur.

I have the honour to submit herewith an estimate amounting to Rs1,04,400/- for power supply to Hindupur. The report accompanying the estimate explains, in full, the provisions made in the estimate and the conditions under which power supply will be made available to Hindupur.

The estimate is prepared in view of the representations made by the people of Hindupur to the First Member of Council during his tour in Kolar District in February 1939 and the various interviews the Municipal Commissioner and other leading citizens of Hindupur had with me.

A 37,500-volts line is proposed to be run up to the State Frontier from Dodballapur via. Goribidnur. The estimate provides for the transmission line and other equipment necessary for this purpose. Running the 37,500-volt line from the State Frontier to Hindupur and

installing Frequency Changer Sets, sub-station equipments, etc., at Hindupur will have to be executed by the Hindupur Municipality at their expense. The estimate does not provide for these items of work.

I have carefully studied the present load conditions in Hindupur and the future load demands as forecast by the Hindupur Municipal Engineer. With a population of nearly 20,000 an important place like Hindupur can certainly consume power commensurate with the load now experienced in Shimoga, a town with a population equal to that of Hindupur. Shimoga now takes on an average more than 65,000 units per month and as such Hindupur can certainly be expected to consume not less than 60,000 units per month in the next few years after the electrification of Hindupur. When the consumption reaches this figure, Government's revenue will at the rates recommended be Rs3,000 per mensem.

The Municipal Commissioner, Hindupur, in his letter No.2967-G.36 dated 23rd February 1939, copy of which is herewith attached, and during his subsequent interviews with me has furnished details of the connected load, the maximum demand that could be expected and the maximum consumption of units per month, on which the estimate is based.

The normal consumption expected by the Municipality per month is 36,500 kilo-watt-hours and the guaranteed minimum consumption per month is taken at 2/3 of the normal consumption, i.e., 25,000 units. It will be a sound proposition to provide power supply to Hindupur if Government contemplate supplying power to places outside the State. In consideration of the future load demand in and around Hindupur, the following rates may be charged for power supply to Hindupur, our line terminating at the Frontier and all expenses towards

the main line and sub-station system, etc. outside the State being borne by the Hindupur Municipality and power being metered in their sub-station on the High Tension side:-

1. For the first 25,000 units (Guaranteed minimum consumption). .. at Re0-1-0 per unit.
2. For the remaining 11,500 units. .. at .8 anna per unit.
3. For power over and above 36,500 units. .. at .6 anna per unit.

Revenue realised on 36,500 units at the above rates would be:-

For the first 25,000 units	..	Rs1,562 8 0
For the remaining 11,500 units.	..	718 12 0
Total per month	..	Rs2,281 4 0
Revenue per annum	..	Rs27,375 0 0
		17% gross return.

I would, therefore, strongly recommend that the question of power supply to Hindupur be favourably considered in view of its being a remunerative proposition.

It would be possible to supply power to Hindupur after the Shimsha Generating Station with its two units go into regular service.

I have the honour to be,
Sir,
Your most obedient servant,

B 31/1-

PVK.VJN.BN.
24.5.1939.

Chief Electrical Engineer.

Letter No:R.C.2967-G/36 dated 23rd Feby.1939 from the Commissioner, Hindupur Municipality, to the Chief Engineer for Electricity, Mysore Government, Bangalore.

Hindupur Municipality - Investigation into bringing Mysore Bulk Supply.

Ref: Informal discussion of 10th Jan.39.

In continuation of the informal discussion, I and the Municipal Electrical Engineer had with you on 10th January 1939, I have the honour to intimate to you that a consultation on this subject was made with the Electrical Inspector, Electricity Department, Madras Government, Madras, on 14-2-1939 and now I am in a position to furnish you the following information upon some of the points raised by you. Further, I have the honour to request you to furnish me information on the following points and give me an interview to discuss these and certain other features of this Scheme. I desire to come to your office on Monday the 27th February 1939 during office hours and wish to know if that date will suit you or your technical Assistants.

The following gives information on the points raised by you:-

1) That the connected load of this Municipality, is ..... 225 kW

2) The Maximum demand will be about 100 kW

3) The Maximum consumption of units per month shall be ..... 36,500 Units.

4) The average consumption shall be about 2/3 of the above at the outset.

5) This estimate has been prepared on a conservative basis for immediate necessities; but a good future is expected after convassing and load development.

Information on the following points is requested of you with an opportunity to discuss these and other points at an informal discussion on 27th February 1939:-

1) Whether we can take at your existing system of 3 phase, 4,500 volts at 25 cycles right up to Hindupur from your Frontier.

2) Whether you have any objection if we change your frequency of 25 cycles/Sec. into 50 cycles/Sec. to conform to the popular system of the Madras Presidency and also the voltage suitably.

3) Whether it is possible for you to draw up and own the transmission line from Doddakurugodu till Hindupur provided we pay you on your Capital charges and suitable approval and technical sanctions from our Government are obtained.

4) Whether you are willing to maintain the above Transmission Line for any charges mutually agreed upon.

5) The period of currency of the agreement between us in case a supply is given.

Only certain important points have been put before you with the hope of discussing a number of other details a-t an interview.

I hope you would be good enough to grant an ~~at~~ interview at Bangalore on 27th February 1939 at your Office between 11 and 12 Noon.

The favour of an early reply is requested.

Government of Mysore. Electrical Department.

Report to accompany the estimate for power supply to Hindupur:-

The question of power supply to Hindupur was considered in the year 1934 when a deputation from the Hindupur Municipality waited on the Dewan of Mysore. But the question was dropped in view of the then loading conditiens in the State which did not permit of any large blocks of power being spared for places outside the State.

The question of power supply to Hindupur is now taken up again for consideration in view of the further representations made by the people of Hindupur to the First Member of Council during his tour in Kolar District in February 1939 and the frequent interviews the Municipal Commissioner and other leading citizens of Hindupur had with the Chief Electrical Engineer.

The Municipal Commissioner of Hindupur in his letter No.2967/G.36-dated 23rd February 1939 has furnished the details re: the connected load, the maximum demand that could be expected, the maximum consumption of units per month, etc. on whichthe estimate is based.

The estimate is prepared on a conservative basis, as the Commissioner reports in his letter that the load demands are expected to be much more than what is actually stated therein.

The estimate provides for the extension of the 37,500 volts,three phase line from Dodballapur to Goribidnur, a distance of 22 miles and from Goribidnur to the State Frontier, a distance of 9 miles, using 46½ft. fabricated structures with suitable sectionalising switches,etc.

A telephone line is also to be extended from Dodballapur to the State Frontier, via Goribidnur to maintain

satisfactory power service to Hindupur.

Provision is made in the estimate for the necessary buildings at Dodballapur, Goribidnur and at an intermediate place on the transmission line.

The 4600 volts 3 phase line now running between Chickballapur and Goribidnur, a distance of 21 miles is already overloaded and the voltage conditions at Goribidnur is very bad, therefore there has been a proposal to remodel the line in order to improve the voltage conditions at Goribidnur, and to supply additional loads in that area. The present proposal to extend the 37,500 volts line from Dodballapur to Goribidnur completely eliminates the necessity for remodelling the line.

The installation of an out-door Transformer Station at Goribidnur is, however, necessary for the supply of power to Goribidnur from the 37.5 kV line, hence credit is shown in this estimate to the extent of the amount that would otherwise be necessary to increase the capacity of the copper conductor from Chickballapur to Goribidnur less the amount that is required for the installation of a step-down station at Goribidnur.

The transmission line from the State Frontier to Hindupur does not form part of this estimate and will have to be executed by the Hindupur Municipality.

SGF-PVK-VJN.

The Secretary to Hon'ble the Resident in Mysore,

Bangalore.

Sir,

I am directed to refer to your letter No. D.8373-34 / R.O.II of 26th September 1934 forwarding from the Madras Government a request from the Commissioner of the Hindupur Municipality that the Electrical Department of the Government of Mysore should arrange to supply electric power to that town.

An estimate has been prepared for carrying a supply line as far as the Mysore frontier. But before anything further is done I have the honour to request that the Madras Government may be asked whether they desire that the town of Hindupur should be supplied with electric power from the Mysore State, if this is found feasible.

I have the honour to be
Sir
Your most obedient servant,

Secretary to Government
Electrical Department

ELECTRICAL SECRETARIAT
BANGALORE.
Reg. No. 2195
Date 21.6.39

From

S. G. FORBES, ESQ., E.E., B.Sc., E. & M.E., MEM. A.I.E.E.,
CHIEF ELECTRICAL ENGINEER,
TO THE GOVERNMENT OF MYSORE.
BANGALORE.

To

The Secretary to Government,
Electrical Department,
Bangalore.

Sir,

Herewith submitted

Sir,

ELECTRIFICATION OF HINDUPUR.

I have your No.EDS.2869 dated the 3rd June 1939 and in reply have the honor to suggest that conditions have very materially changed since this office letter No.3177 dated the 15th September 1934 was written. The Shimsha New Project has been sanctioned since that time and is expected to be in full operation before the works necessary for supplying the power to Hindupur can be completed and the expected power demands in Hindupur can be met out of the blocks of power set aside in the Power Survey for the annual incfements in the Bangalore Section.

I have the honor to be,
Sir,
Your most obedient servant,

S.G. Forbes
Chief Electrical Engineer

SGF-PRN.

await sanction.

with his letter dated the 24/30th May 1939 the B.B.&C.I. has submitted, for sanction of Govt; an estimate amounting to Rs. 1,04,400/- for the electrification of Hindupur. The Secretary to the Hon'ble the Resident in Mysore has been addressed (Folio 57) to ask the Madras Govt. whether they desire that the Town of Hindupur should be supplied with electric power from the Mysore State. His reply is awaited.

In re. power supply to Lyadibanda the report promised by the Deputy Commissioner will be awaited. The reference may perhaps be recorded for the present.

VD

Sir,

Subject:- Tour notes of the First Member of Council in the Kolar District in the month of February 1939.

- - - -

In continuation of my letter of even number dated 16th May 1939 forwarding a report of progress of action during the month of April 1939 with regard to the several subjects contained in the above notes I have the honour to furnish below further progress of action taken on each of the subjects for favour of perusal.

Sl.No.20:- Supply of Electric power to Chowlur Village, Hindupur Taluk:- The Chief Electrical Engineer has intimated that an estimate has been submitted to Government to provide power supply to Hindupur and that the electrification of Chowlur village will be taken up when the question of power supply to Hindupur matures. Hence this subject may be kindly treated as disposed of.

Sl.No.21:- Supply of Electric Power to Gudibanda:-

With regard to the representation of the residents of the Town praying for Electrification of their Town, proposals have been called for from the Amildar, President of Gudibanda Municipal Council and his report is awaited. He has been reminded again to expedite proposals on receipt of which a further communication will be rade.

I have the honour to be,
Sir,
Your most obedient servant,

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

ELECTRICAL DEPARTMENT.

G. O. No. E. D. S. 252-315, dated 3rd August 1939.

Standard Frequency of 50 Cycles.

Passes orders *re* the adoption of the —— in connection with the generation of Power at the Jog Falls by 1942 and also for the rest of the State at a later date, etc.

READ—

Government Order No. E. D. S. 205-7, dated 4th August 1937, conveying administrative sanction to prepare estimates, etc., in connection with the Jog Falls Hydro-Electric Scheme.

2. Proceedings of the Meetings of the Hydro-Electric Schemes Committee held on the 10th and 29th November 1938 *in re* question of frequency to be adopted and other matters.

3. Letter No. 2717, dated the 12th May 1939, addressed to the Publicity Officer, Mysore Government, forwarding, for giving publicity, a copy of English Notification stating that the frequency for the Jog Project might be 25 or 50 and that consumers should purchase electrical equipment which might be suitable for both 25 and 50 cycles supply.

ORDER No. E. D. S. 252-315, DATED BANGALORE, THE 3RD AUGUST 1939.

The main electric power supply of Mysore is alternating current, the frequency of which is 25 cycles per second. This is however converted into 60 cycles for all domestic supplies in Bangalore and Mysore Cities. These frequencies were adopted many years ago when the Cauvery Falls were first harnessed at Sivasamudram for power generation.

2. In recent years, there has been a movement in practically every country in the World to standardise one frequency only. As the lower frequencies such as 25 when used for lighting, produce a flicker which is injurious to the eye, the tendency is for the standard frequency to be either 50 or 60. In Europe, the standard frequency is generally 50 cycles. This is also the standard frequency adopted in the adjoining Provinces of Madras, Bombay and elsewhere in India.

3. The question of abandoning the existing frequencies in Mysore in favour of the standard Indian frequency of 50, has been engaging the attention of Government for some time past. It is estimated that by the adoption of this frequency for the Jog Scheme, there will be a saving which in a comparative short time will pay for the cost of conversion in the rest of the State, and thereafter, there would be an annual saving to Government and consumers from 2½ to 5 lakhs of rupees. Government, after carefully considering all the aspects of the case, are pleased to order—

(1) that 50 cycle frequency be adopted for generating power at the New Jog Hydro-Electric Station;

(2) that the rest of the State excluding the Kolar Gold Fields area be converted from 25 cycles to 50 cycles at a later date;

(3) that manufacturers and consumers be informed that the standard frequency in the North-West of the State will be 50 cycles from about 1942, when the Jog Scheme is expected to come into operation, and that the rest of the system will be converted from 25 to 50 cycles any time between 1942 and 1950.

I am directed to refer to endorsement from this Residency D.Dis.No.F.365-39/Pol., dated the 19th August 1939.

2. The Government of Madras write that the proposal is under consideration and that their decision will be communicated as early as possible.

I have the honour to be,
Sir,
Your most obedient servant,

for SECRETARY TO THE RESIDENT.

KK

The reply to this communication should be addressed to the Secretary to the Resident Mysore, Bangalore, by designation and not by name.

FROM

THE SECRETARY TO THE HON'BLE THE RESIDENT IN MYSORE.

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Electrical Department, B a n g a l o r e.

Dated Bangalore, the 9th November *1939*.

Supply of electricity to Hindupur.

Your letter No.E.D.S.2868, dated the 3rd June 1939.

SIR,

I am directed to refer to the correspondence ending with my letter D.Dis.No.F.365-39/G & A., dated the 2nd September 1939.

2. The Government of Madras write that the proposal of the Government of Mysore to supply electricity to Hindupur cannot be taken up at present, but that they would be prepared to consider the question later if the Government of Mysore were willing to supply at 50 cycles at a place very near Hindupur on favourable conditions and rates.

I have the honour to be,
Sir,
Your most obedient servant,

for SECRETARY TO THE RESIDENT.

FROM

The Secretary to Government,
Electrical Department,
Bangalore

To

The Chief Electrical Engineer,
Bangalore.

Subject :—

Electrification of Hindupur.

Sir,

With reference to correspondence ending with your letter No. 29477 dated the 20th June 1939 on the above subject, I am directed to state that it is not now necessary to ~~the~~ sanction the estimate amounting to Rs. 1,04,000/-, submitted with

M D 018—GPE—2,000—28-7-38

your letter No. 27632 dated the 24/30th May 1939, as the Govt. of Madras have since replied that the proposal of the Govt. of Mysore to supply electricity to Hindupur cannot be taken up at present and that they would be prepared to consider the question later, if the Govt. of Mysore were willing to supply at 50 cycles at a place very near Hindupur on favourable conditions & rates. Besides, the estimate in question may require revision on account of rise in the cost of labour. One lakh of rupees is therefore not sufficient. I have etc.

Estimate (in duplicate)

20th November 39

The Chief Electrical Engineer
to the Government of Mysore,
Bangalore.

Sir,

Subject:- Electrification of Hindupur.

With reference to correspondence ending with your letter No.29477 dated the 20th June 1939 on the above subject, I am directed to state that it is not now necessary to sanction the estimate amounting to Rs 1,04,000/- submitted with your letter No.27632 dated the 24th/30th May 1939, as the Government of Madras have since replied that the proposal of the Government of Mysore to supply electricity to Hindupur cannot be taken up at present and that they would be prepared to consider the question later, if the Government of Mysore were willing to supply at 50 cycles at a place very near Hindupur on favourable conditions and rates.

2. Besides, the estimate in question may require revision on account of war. The same is therefore returned herewith.

I have the honour to be,
Sir,
Your most obedient servant,

D. S. Veeraraghavan
Secretary to Government, 20.11.39
Electrical Department.

A.J.
